Jobs at EFW

Benefits

- Career planning, development and training
- Strong team spirit
- Working time value accounts
- Salary with many company extras
- Health offers
- Company pension and care service
- Subsidy for job ticket and job bike
- Employee and family events
- Many more extras and benefits

Elbe Flugzeugwerke GmbH (EFW) combines various aviation and technology activities under one roof: development and production of fiber composite components for aircraft, conversion of passenger aircraft into freighters (P2F), MRO services for all Airbus aircraft, and engineering services within the scope of certification and approval. As a group, the company currently employs more than 2,000 people and is on a strong growth path.

EFW is an experienced industry expert with an impressive track record spanning three decades: over 5 million composite components produced and now implemented in more than 11,000 Airbus aircraft, more than 200 converted aircrafts and numerous maintained commercial and military aircraft. More than 40 customers worldwide operate freighter aircraft converted by EFW, including the largest express air cargo companies in North America and Europe.

Today, as a center of excellence for freighter conversions, EFW offers a complete Airbus freighter family with the new A320P2F, A321P2F and A330P2F programs and also conversion sites in China, the U.S., Singapore and Turkey. EFW's parent companies are ST Engineering and Airbus. The company is headquartered in Dresden, Germany.

P2F EXCELLENCE CENTER & MRO SOLUTIONS

- + 3 decades experience in Airbus aircraft conversions
- + 200 Airbus A300/A310 medium widebody aircraft converted
- + STC holder for all recent Airbus conversion programs
- + Paradigm shift bringing more fuel efficient, sustainable conversion freighters
- + STC holder for new generation of freighter aircraft for both, the wide body and single aisle segment (A330P2F, A321P2F, A320P2F)
- + "Made in Germany" quality standards and conversion performance
- + Close collaboration with ST Engineering and Airbus to boost P2F capacities worldwide
- + Integrated heavy maintenance checks and individual maintenance services

COMPOSITE SOLUTIONS

- + 3 decades of experience in composite manufacturing
- + We offer composite products and solutions from floor panels up to cabin interiors
- + Turnkey product solutions
- + Leading edge technologies
- + Highly automated production facilities
- + Innovative lightweight products for aviation and transportation

"Whenever you fly with an Airbus, you step on floor made by EFW".
